Category List of Registered Type

Applicant	
Name/pattern	
Rim diameter	19
Structure	1P
Ref. No.	

Category no.	Test report attached	Rim width	JWL	JWL-T	Inset etc. (mm)	Mounting hole				Indication mark for limited use		Remark
						P.C.D (mm)	Number of bolt holes	Total number of holes	Spec	P	T	
01	○	8J	○		55	114.3	5	5	Single	700		Representative Type
02		8J	○		45	112	5	5	Single	700		
03		8J	○		35	112	5	5	Single	700		

Since the load value display of the hub-installation specifications set at 5 X 112 for a 19-inch rim is 700KG throughout all the applied models for registration, the same value (700KG) can also be registered as a load value display for the hub-installation specifications set at 5 X 114.3 when it is produced from the same mold.

- Note
- (1). Reference number should be assigned in the order of the type applied for registration.
 - (2). Circle either JWL or JWL-T when applicable.
 - (3). For application for a representative type, assign the category number '01' to the representative type (basic type) for the test report and succeeding number to the other types.
 - (4). In the Inset column, use the corresponding descriptions to the subjected wheel (such as Inset, Zero-set, Outset or Offset) with its distance filled in too.
